

Please remember that you work for the citizens of the United States, not the Broadcasters, MPAA, RIAA or other oligopolies. The airwaves belong to the citizens

and the broadcasters are loaned the spectrum in trust for the citizens. The Broadcast Flag is another attempt for these oligopolies to maintain and extend their oligopoly by using the government as a protection arm. Please do not do that

and instead allow for the creative disruption of these oligopolies through free market technological innovation. They need to figure out how to thrive in a new technological environment and not use the FCC to protect their old distribution mechanisms. If they go out of business, that is the free market, if they are protected by the FCC, that is corporate socialism at best and crony capitalism at

worse.
